Story & Lore Bridge Expansion

The **Story & Lore Bridge Expansion** contains 60 cards designed to enhance The Story Engine® Deck prompts using cards from Lore Master's Deck,™ and vice versa. This expansion includes 15 **Engines**, 15 **Conflicts**, 4 **Factions**, 4 **Figures**, 4 **Events**, 4 **Locations**, 4 **Objects**, 4 **Materials**, 4 **Creatures**, and 2 **Deities**. Shuffle these cards in with cards of the same type.

Story Engine Deck cards from this expansion are marked with the symbol. Cues on these cards contain icons that work like the icons of a link cue (Lore Master's Deck Guidebook, p. 5). If you draw one, select your cue as normal and then follow the instructions in the next column.

For Engines: Review the icon(s) on your chosen cue. Rather than drawing and placing the card that this **Engine** would normally be oriented toward, draw primary Lore Master's Deck cards of the indicated type(s) and choose one or more to use in its place. Continue your prompt as normal.

For Conflicts: Review the icon(s) on your chosen cue. Draw primary lore cards of the indicated type(s) and complete the **Conflict** as though it were a link cue. Tuck any lore cards under the active cue of the **Conflict**. Continue your prompt as normal.

If it helps to flesh out your prompt, you may expand these lore cards into full lore clusters. Place the expanded lore cluster to the side of your story prompt. Use a locked card (The Story Engine Guidebook, p. 3) to represent the placement of the lore cluster in the story prompt and use link tokens to map the connection.

"An apprentice wants to capture a secret chimera but their flesh will be transformed (into scales)." The "chimera" and/or "scale(s)" cards can be expanded into lore clusters.

Lore Master's Deck cards from this expansion are marked with the  symbol. If you draw one, select your cue as normal and then follow the instructions below:

- **Primary lore card:** Review the icon(s) on your chosen cue. Draw *Story Engine* cards (and/or *Lore Master's Deck* cards) of the indicated type(s). Choose a cue from these cards to complete a nickname for the new lore element and tuck it under the active cue on the primary lore card. The result can be treated as an actual in-world epithet, or general inspiration for that lore element's reputation or nickname. Treat the tucked card as though it is a primary lore card joined via a secondary link cue.

- **Secondary lore card:** Review the icon(s) on your chosen cue. Draw *Story Engine* cards (and/or *Lore Master's Deck* cards) of the indicated type(s) to complete the cue.

Most tucked  **Agents**,  **Anchors**, and primary lore cards can be expanded using the link cue rules.  **Agents** are treated as  **Figures**.  **Anchors** are treated as  **Objects**,  **Materials**,  **Locations**, or  **Events** depending on the closest fit for your chosen cue.  **Engines**,  **Conflicts**, and  **Aspects** usually operate as secondary cues of the card they are immediately tucked under, with  **Engines** acting as link cues to other primary card types. If an  **Engine**,  **Conflict**, or  **Aspect** is tucked under a card that

you later expand into its own lore cluster, transfer it and any other cards tucked under it to the new cluster. Treat the tucked card(s) as one secondary cue in the new cluster.

Tip for Bridge Cues

Bridge cues work best when approached with flexible thinking. At first, some card pairings may seem unintuitive or work differently than the ones you are used to. Keep in mind that the least expected connection often holds the richest creative material. Dive in with an open mind. Feel free to adapt the process to suit your preferences, to discard and draw additional cards to explore alternate card pairings, and to invent new card arrangements to map the connections between cues.

Agent or Figure? Anchor or Object?

 **Figures** and  **Objects** use the same icons as  **Agents** and  **Anchors**. The card types are often interchangeable, despite appearing in different decks. In this expansion, assume these icons always indicate a card type from the opposite deck. Whenever an ambiguous icon comes up, assume that *Story Engine* cards bridge to *Lore Master's Deck* cards and vice versa. Some icons are unique to their decks and always indicate a card of that type.

This prompt began with the *Courier's Guild*, a  **Faction** formed in response to the threat of a superhuman who wants to control a village. Then, the superhuman  **Agent** card was expanded into a  **Figure**-type lore cluster, with the tucked  **Engine** and  **Anchor** being included in the new cluster as a secondary link cue on the right side.
