

World & Lore Bridge Expansion

The **World & Lore Bridge Expansion** contains 60 cards designed to enhance *Deck of Worlds™* prompts using cards from *Lore Master's Deck™*, and vice versa. This expansion includes 8 📖 **Origins**, 14 🧑 **Attributes**, 8 🎲 **Advents**, 4 🏹 **Factions**, 4 🧑 **Figures**, 4 🎯 **Events**, 4 📍 **Locations**, 4 📌 **Objects**, 4 🌍 **Materials**, 4 🐾 **Creatures**, and 2 🏛️ **Deities**. Shuffle these cards in with cards of the same type.

Deck of Worlds cards from this expansion are marked with the 🌐 symbol. Cues on these cards contain icons from *Lore Master's Deck*. If you draw one, select your cue as normal and complete it as though it is a link cue (*Lore Master's Deck Guidebook*, p. 5).

If it helps to flesh out your prompt, you may expand these lore cards into full lore clusters, linking them to your world map using link tokens.

The settlement in the Shattered Mountains was ground zero for an ancient calamity (fire). Right now, a power grab is being planned by a 🏹 **Faction** (a rebellion). The fire or rebellion could be expanded into their own lore clusters.

Lore Master's Deck cards from this expansion are marked with the  symbol. If you draw one, select your cue as normal and then follow the instructions below:

- **Primary lore cue:** Review the icon(s) on your chosen cue. Draw *Deck of Worlds* cards (and/or *Lore Master's Deck* cards) of the indicated type(s). Choose a cue from these cards to complete a nickname for the new lore element and tuck it under the active cue on the primary lore card. The result can be treated as an actual in-world epithet, or general inspiration for that lore element's reputation or nickname. Treat the tucked card as though it is a primary lore card joined via a secondary link cue.

- **Secondary lore cue:** Review the icon(s) on your chosen cue. Draw *Deck of Worlds* cards (and/or *Lore Master's Deck* cards) of the indicated type(s) to complete the cue.

Most tucked  **Regions**,  **Landmarks**, and primary lore cards can be expanded using the normal link cue rules.  **Regions** and  **Landmarks** are treated as  **Locations**.

All other card types ( **Namesake**,  **Origin**,  **Attribute**, and  **Advent** from *Deck of Worlds*; and  **Adventure**,  **Keyhole**,  **Opus**, and  **Flourish** from the *Creative Expansions*) are treated as secondary cues applying to the closest

primary-type card above them in the tucked stack. If the primary-type card is transferred or expanded to a new lore cluster, transfer the tucked card(s) as well, treating the stack as one secondary cue.

Tips for Bridge Cues

Bridge cues work best when approached with flexible thinking. At first, some card pairings may seem unintuitive or work differently than the ones you are used to. Keep in mind that the least expected connection often holds the richest creative material. Dive in with an open mind. Feel free to adapt the process to suit your preferences, to discard and draw additional cards to explore alternate card pairings, and to invent new card arrangements to map the connections between cues.

Landmark or Location?

 **Landmarks** and  **Locations** use the same card type icon. These card types are often interchangeable, despite appearing in different decks. In this expansion, assume these icons always indicate a card type from the opposite deck.

Whenever an ambiguous icon comes up, assume that *Deck of Worlds* cards bridge to *Lore Master's Deck* cards and vice versa. Some icons are unique to their decks and always indicate a card of that type.

This lore web began with a  **Creature** (the dreaded "mine cobra"), which is linked to the  **Origin** (folk song) of a  **Landmark** (peak). Perhaps the folk song describes this solitary creature? Next, the peak was expanded into a  **Location**-type lore cluster, with its  **Origin** being incorporated as a secondary cue.
